(PUBLIC LAW 97-276, ENACTED OCTOBER 2, 1982)
(PUBLIC LAW 97-424, ENACTED JANUARY 6, 1983)

FISCAL YEAR ENDING SEPTEMBER 30, 1985

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

THE SECRETARY OF TRANSPORTATION
WASHINGTON, D.C. 20590

March 31, 1986

The Honorable George Bush
President of the Senate
Washington, DC 20510

Dear Mr. President:

I am pleased to transmit to you the Fourth Annual Report of
Accomplishments Under the Airport Improvement Program as
required by Section 521 of the Airport and Airway Improvement
Act of 1982.

Sincerely,

Elizabeth Hanford Dole

FOURTH ANNUAL REPORT OF ACCOMPLISHMENTS UNDER THE
AIRPORT IMPROVEMENT PROGRAM

Section 521 of the Airport and Airway Improvement Act of 1982 (Public Law 97-248) requires that the Secretary of Transportation submit an annual report to Congress describing the accomplishments of the airport grant program. This report covers activities for the fiscal year ending September 30, 1985.

BACKGROUND

To promote the development of a system of airports to meet the Nation's needs, the Federal Government embarked on a grants-in-aid program shortly after the end of World War II. This early program, the Federal-aid Airport Program (FAAP), was brought into existence with the passage of the Federal Airport Act of 1946 and drew its funding from the general fund of the treasury.

In 1970, a more comprehensive program was established with the passage of the Airport and Airway Development Act of 1970. This Act provided for airport planning under the Planning Grant Program (PGP) and for airport development under the Airport Development Aid Program (ADAP). These programs were funded from a new Airport and Airway Trust Fund, into which were deposited revenues from several aviation user taxes on such items as airline fares, air freight, and aviation gasoline. The Act, after several amendments and a one-year extension, expired on September 30, 1981.

The current grant program, known as the Airport Improvement Program (AIP), was created by the Airport and Airway Improvement Act of 1982 (Title V of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248, September 3, 1982). It provides assistance under a single program for airport planning and development through funding from the Airport and Airway Trust Fund. The 1982 Act also authorizes funds for noise compatibility planning and to carry out noise compatibility programs as set forth in the Aviation Safety and Noise Abatement Act of 1979 (P.L. 96-193).

The Act also requires the Secretary of Transportation to publish a report on the status of the National Plan of Integrated Airport Systems (NPIAS). The NPIAS emphasizes system planning and development to meet current and future airport needs; it includes development considered necessary to provide a safe, efficient, and integrated airport system, meeting the needs of civil aviation, national defense, and the Postal Service. An airport must be included in this plan in order to be eligible to receive a grant under the AIP. The first edition of the NPIAS was transmitted to the Congress by Secretary Dole on August 2, 1985.

The Airport and Airway Improvement Act has been amended twice. The Continuing Appropriations Act (Public Law 97-276, October 2, 1982) added a section providing authority to issue discretionary grants in lieu of unused apportioned funds under certain circumstances, and the Surface Transportation Assistance Act (Public Law 97-424, January 6, 1983) increased the annual authorizations for the AIP for fiscal years 1983-1985.

Chart I depicts the various functions legislated by the three major grant program authorization Acts since 1946, FAAP, ADAP, and AIP.

POLICY

In formulating the Airport and Airway Improvement Act, the Congress included a "Declaration of Policy" section which states that:

- The safe operation of the airport and airway system will continue to be the highest aviation priority;
- The continuation of airport and airway improvement programs and more effective management and utilization of the Nation's airports are required to meet the current and projected growth of aviation and the requirements of interstate commerce, the Postal Service and the national defense;
- The Act should be administered in a manner to provide adequate navigation aids and airport facilities, including reliever airports and reliever heliports, for points where scheduled commercial air service is provided;
- The Act should be administered in a manner consistent with a comprehensive airspace system plan to maximize the use of safety facilities, with highest priority for commercial service airports, including but not limited to, the goal of installing, operating, and maintaining, to the extent possible under available funds and given other safety needs, a precision approach system and a full approach light system for each primary runway, grooving, or friction treatment of all primary and secondary runways, a nonprecision instrument approach for all secondary runways, runway end identifier lights on all runways that do not have an approach light system, electronic or visual vertical guidance on all runways, runway edge lighting and marking, and radar approach coverage for all airport terminal areas; (Note: The Facilities and Equipment Appropriation provides funding for items meeting published criteria that are not included in airport development grants.)
- The Act should be administered in a manner consistent with the Federal Aviation Act of 1958 with due regard for the goals expressed therein of fostering competition, preventing unfair competition in air transportation, maintaining essential air transportation and preventing unjust and discriminatory practices;
- Special emphasis should be given to reliever airports and their development;
- Aviation facilities should be constructed and operated in a manner consistent with the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible uses;
- The Federal administrative requirements placed upon airport sponsors can be reduced and simplified through the use of a single project application to cover all airport improvement projects to be undertaken in a particular year; and

- It is in the national interest to develop in metropolitan areas an integrated system of airports designed to provide expeditious access and maximum safety.

THE AIRPORT IMPROVEMENT PROGRAM

The Airport and Airway Improvement Act of 1982 authorizes the Secretary of Transportation to make grants for airport planning and development under the Airport Improvement Program (AIP).

Annual Authorization

Authorization levels for the program are as follows:

\$ 450,000,000	for fiscal year 1982
\$ 800,000,000	for fiscal year 1983 *
\$ 993,500,000	for fiscal year 1984 *
\$ 987,000,000	for fiscal year 1985 *
\$1,017,000,000	for fiscal year 1986
\$1,017,200,000	for fiscal year 1987

- * The annual authorizations include \$200 million for each of the fiscal years 1983 and 1984 and \$75 million for FY 1985 as authorized in the Surface Transportation Assistance Act (STAA) of 1982 (Public Law 97-424, January 6, 1983).

Airport Categories

The airport funding categories consist of Commercial Service, Primary, Reliever and General Aviation Airports.

A commercial service airport is a public airport which enplanes 2,500 or more passengers annually and receives scheduled passenger service.

A primary airport is a commercial service airport which enplanes .01 percent or more of the total number of passengers enplaned annually at all airports. For the fiscal year 1985 program, .01 percent was equal to 33,903 passengers.

A reliever airport is one that has been designated as having the function of relieving congestion at a commercial service airport and providing more general aviation access to the overall community.

General aviation airports, although not specifically defined in the 1982 Act, comprise the largest single group of airports in the U.S. airport system; these are the airports that remain after exclusion of the commercial service and primary airport categories.

The legislative definition of airports as any area of land or sea used for landing and takeoff of aircraft allows inclusion, within the above four categories of airports, of special types of facilities such as seaplane bases or heliports.

Distribution of Funds

Not more than 50 percent of the annual authorization (not including STAA funds) may be provided as entitlements to primary airports. These funds are apportioned for use by each airport sponsor based on the following formula:

\$6.00 for each of the first 50,000 enplaned passengers
\$4.00 for each of the next 50,000 enplaned passengers
\$2.00 for each of the next 400,000 enplaned passengers
\$0.50 for each passenger in excess of 500,000 enplaned passengers

Additionally, the apportionment for each primary airport is to be increased as follows for fiscal years 1984-1987:

1984	-	10%
1985	-	20%
1986	-	25%
1987	-	30%

Except for cases where appropriations actions may require adjustments, no primary airport receives less than \$200,000 nor more than \$12,500,000 per year. This money remains available for the sponsor's use for the fiscal year in which it is authorized and the two fiscal years immediately following.

A total of 12 percent of the annual authorization (not including STAA funds) is for use within the States and Insular Areas. The 50 states, the District of Columbia and Puerto Rico qualify for 99 percent of the 12% annual authorization for general aviation airport projects, while in the insular areas (Guam, American Samoa, the Government of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and the Virgin Islands), all airports other than primary airports qualify for 1 percent of the 12 percent. Funds apportioned to the States and Insular Areas remain available for the fiscal year in which authorized and the two fiscal years immediately following.

Additionally, Alaskan airports receive at least as much money as they were apportioned in fiscal year 1980 under previous grants legislation. This amounted to \$12.1 million additional for Alaskan airports in fiscal year 1985.

The remaining funds are defined as discretionary, but a sizable portion of these must be used to achieve specified funding minimums. A minimum of 10 percent of all funds (not including STAA funds) is for reliever airports, 5.5 percent is for non-primary commercial service airports, 8 percent is reserved for planning and implementing noise compatibility programs under the Aviation Safety and Noise Abatement Act of 1979, and 1 percent is for the preparation of integrated airport system plans.

Rate of Participation

Federal participation at all except the busiest commercial service airports is 90 percent of the total project cost. Primary airports whose total annual enplanements are 0.25 percent or more of the total number of passengers enplaned annually at all commercial service airports (921,094 or more enplanements in FY 1985) receive Federal participation at a rate of 75 percent. There are upward adjustments in states containing high percentages of public lands. Grants for Integrated Airport System Planning are funded at a 90 percent level. Development and land acquisition conducted in accordance with the Aviation Safety and Noise Abatement Act is funded at an 80 percent level. For eligible areas of terminal buildings at commercial service airports, the Federal share may not exceed 50 percent.

Environmental Considerations

The Federal Aviation Administration (FAA) considers and weighs environmental factors along with safety and economics in evaluating proposed Federal actions relating to airports. FAA Airports Program procedures identify types of actions which require an environmental assessment and consultation process. This process provides the FAA, other agencies, and members of the public with an understanding of the potential environmental impacts of a proposed action. Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) requires an environmental impact statement when an action would produce a significant impact on the environment; otherwise, a finding of no significant impact may be prepared. Other laws have particular requirements relative to specialized concerns such as air quality, water quality, public recreational lands, historic and archeological sites, endangered species, coastal zones, wetlands, and floodplains.

Initial review of proposed Federal airport actions identifies the extent of environmental analysis and coordination required. If an action is not in a category requiring environmental assessment and does not have the potential, either individually or through cumulative effects, of significantly affecting the environment, it is categorically excluded from environmental processing. As experience has been gained in the environmental field, FAA procedures have categorically excluded more types of development projects from environmental processing.

In FY 1985, the FAA continued processing documentation submitted under provisions of the Aviation Safety and Noise Abatement Act of 1979. To date, FAA has issued determinations under Section 104 of the Act on 16 Noise Exposure Maps, and approved 9 Noise Compatibility Programs. Several more noise plans across the country, developed prior to the Act, have been found by FAA to be "substantially consistent" with the purposes of the Act in accordance with Section 104(c)(2). FAA is issuing grants for development of the maps and programs and is funding the implementation of recommendations included in approved programs.

Civil Rights Requirements

Provision of assistance under the Airport and Airway Improvement Act of 1982 requires an airport sponsor to satisfy certain civil rights requirements. During Fiscal Year 1985, FAA Regional Civil Rights Staffs completed 21 application reviews for compliance with Title VI of the Civil Rights Act of 1964. Four on-site compliance reviews of airport facilities were also conducted. All reviews found the sponsors in compliance or resulted in voluntary compliance.

Civil Rights Staffs approved 742 Minority Business Enterprise (MBE) programs and annual updates required by regulations of the Office of the Secretary of Transportation (OST) 49 CFR Part 23. One hundred two reviews were made of sponsors following program approval, 16 of which were on-site. FAA issued 303 notices for deficient programs or for failure to carry out the terms of an approved program.

Seven discrimination complaints were filed under the MBE regulation, 4 were filed under Section 504 of the Rehabilitation Act of 1973, 6 were filed under Title VI, and 2 Section 30 complaints were received. (Section 30 refers to a section of the Airport and Airway Development Act, which was retained in its entirety as Section 520 of the Airport and Airway Improvement Act.) No Departmental decisions of discrimination were issued.

Fiscal Year 1985 Planning and Development Activity

The airport grant obligation limitation established in the Fiscal Year 1985 Department of Transportation and Related Agencies Appropriations Act was \$925 million. Funds recovered from adjustments to prior year projects were also available.

In FY 1985 obligations amounted to \$934.7 million of which \$848.7 million was for 1,160 new grant agreements; \$4.8 million for increases in existing grant agreements; and \$81.2 million for multi-year grant amendments. This was an all time high for Federal aid to airports in terms of numbers of grants issued and dollars obligated.

The new grants included 390 for a total of \$516,166,090 for primary airports, 135 for \$53,248,876 for other commercial service airports, 145 for \$114,084,677 for reliever airports, 442 for \$158,339,276 for general aviation airports, and 48 for \$6,832,571 for integrated airport system planning. Included in these grants by airport categories are master plan studies at 159 locations totalling \$9,747,342.

A total of \$82,399,445 to achieve noise compatibility involved 70 grants. Of this amount, \$55,175,146 was for the purchase of noise impacted land adjacent to airports; \$4,965,215 for studies to evaluate and develop noise compatibility programs, \$10,234,572 for soundproofing of residences and schools; and \$12,024,512 for other efforts to reduce noise.

Ten grants were issued to start construction of new or replacement airports totalling \$9,396,270, another \$9,892,620 was used to assist public agencies to acquire 5 privately owned airports. Also, \$4,996,307 for 6 grants was awarded for projects at reliever airports remaining under private ownership, and 1 grant for \$205,793 at a commercial service privately owned airport.

Charts II and III on the following pages show the FY 1985 and prior years authorizations and appropriations limitations. Listings of FY 1985 funding by state and location are shown in Tables I and II, respectively.

AIRPORT IMPROVEMENT PROGRAM

AUTHORIZED BY THE AIRPORT AND AIRWAY IMPROVEMENT ACT OF 1982, AS AMENDED

GRANT FUNDING AUTHORIZATIONS, APPROPRIATION LIMITATIONS, AND OBLIGATIONS
(Dollars in millions)

<u>FISCAL YEAR</u>	<u>AUTHORIZATIONS</u>	<u>APPROPRIATIONS ACT OBLIGATION LIMITATIONS</u>	<u>GROSS OBLIGATIONS</u>	<u>1/</u>	<u>NUMBERS OF NEW PROJECTS</u>
1982	\$ 450.0	\$450.0	\$412.5	2/	651 2/
1983	\$ 800.0 3/	\$804.5 4/	\$805.8 5/		1082
1984	\$ 993.5 3/	\$800.0 6/	\$811.5 7/		1104
1985	\$ 987.0 3/	\$925.0	\$934.7 8/	10/	1160
1986	\$1017.0	\$885.2 9/			
1987	\$1017.2				

1/ Gross obligations include current year funds plus reobligations of funds recovered from adjustments to prior year projects.

2/ Includes Airport Development Aid Program (ADAP) entitlements that were authorized to be continued under the Airport Improvement Program (AIP). FY 1982 data do not include a FY 1982 ADAP grant to Reno, Nevada (Cannon International), for \$5.1 million funded with FY 1982 monies authorized prior to approval of the AIP.

3/ Shows increases of \$200 million each in FY 1983 and 1984 and \$75 million in FY 1985 authorized by the Surface Transportation Assistance Act of 1982 (STAA) (Public Law 97-424).

- 4/ Includes the basic authorization of \$600 million and \$150 million of the \$200 million authorized by the STAA and appropriated under the Emergency Jobs Bill (Public Law 98-8), and \$54.5 million of unrequested entitlements carried over from prior years.
- 5 Includes \$736 million for new grant agreements, \$11.0 million for increases to existing agreements, and \$58.8 million for amendments to multi-year grants.
- 6/ Includes the basic authorization of \$793.5 million and \$6.5 million authorized under the STAA.
- 7/ Includes \$739.2 million for new grant agreements, \$9.3 million for increases to existing agreements, and \$63.0 million for amendments to multi-year grants.
- 8/ Includes \$848.7 million for new grant agreements, \$4.8 million for increases to existing agreements, and \$81.2 million for amendments to multi-year grants.
- 9/ \$925.0 reduced to \$885.2 as a result of P.L. 99-177, Balanced Budget and Emergency Deficit Control Act.
- 10/ Not included is \$5.2 million reobligated funds recovered from adjustments to obligations made under the Airport Development Aid Program (ADAP) authorized from FY 1970-1981. Current legislation allows use of recovered ADAP funds for ADAP grant adjustments up to a maximum of 10 percent of the original grant amount.
